Computational Method and the Critique of Race: Racial Difference and the US Novel at Scale, 1880-2000

Richard So (Pitt, Humanities Center) and Hoyt Long (University of Chicago, East Asian Languages and Civilizations)

With responses by R. A. Judy and Alison Langmead

Tuesday, April 3, 12:30-2:00 pm 602 CL

Are computational methods always doomed to produce racial stratification and bias, or can humanists synthesize computation and critique to study power, race, and culture?
